Pass 10

05. The Architect

Calm the Signal. Clear the Queue.

□□□□□□ **COMT Met/Met — Worrier**	□□ **Slow dopamine clearance · Anxiety accumulation · Overstimulation**
□□□: Rocks glass	□: Large cube

□□

- 60 mL strong cold green tea
- 22 mL fresh lemon juice
- 15 mL honey syrup
- 2 dashes Peychaud's bitters
- Top with soda water
- Muddled cucumber slice

□□□

Muddle cucumber. Add tea, lemon, honey, bitters over ice. Top soda water. Do not shake — stir only.

□□**:** Cucumber ribbon + lemon wheel

□□□

Green tea is the primary L-theanine delivery vehicle at a bar — L-theanine increases alpha brain wave activity, directly counteracting the stress-chemical accumulation of the Worrier profile. Cucumber contributes a cooling, low-stimulation frame, and the deliberate stir-not-shake method keeps the whole build gentle.

□□□□□□□□□

The deliberate low-stimulation preparation is part of the experience. No shaker, no drama. This drink is built to feel like everything is already fine.

07. The Still

When the World Is Too Loud.

□□□□□□ **COMT Met/Met — Worrier · Anxiety profile**	□□ **Cortisol regulation · HPA axis support · Sleep architecture**
□□□: Lowball / rocks	□: Single large cube

□□

- 60 mL tart cherry juice

□□□

Stir all over large cube. Add tiny soda splash last.

- 30 mL chamomile tea (cooled, strong)
- 15 mL honey
- 3 dashes Angostura bitters
- Splash soda water

Do not shake.

□□: Dried rosemary sprig pressed to glass

□□□

Tart cherry juice provides melatonin precursors, while chamomile brings apigenin, a flavonoid associated with gentle calming support. Angostura bitters add a bitter backbone that keeps the drink from reading as juice and supports the slow, evening feel of the build.

□□□□□□□□□

This is a slow-sipping drink. Pour it without rush. The rosemary garnish is pressed, not floated — the aromatic is part of the experience, not decoration.

18. The Garden

Heal the Belly. The Mind Will Follow.

□□□□□□ Gut-brain axis · Post-substance gut damage · Serotonin production site

□□ Microbiome support · Gut-derived serotonin · Inflammation reduction

□□□: Highball

□: Full ice

□□

- 90 mL ginger beer (high-quality, live culture)
- 30 mL pineapple juice
- 22 mL lime juice
- 15 mL honey
- 4 fresh mint leaves
- Top with soda water

□□□

Muddle mint lightly. Build pineapple, lime, honey over ice. Top ginger beer, then soda water.

□□: Mint sprig + crystallized ginger if available

□□□

Real ginger beer and mint give this page its identity: a bright, digestive profile with cooling lift. Pineapple and honey round the drink and help it feel like a real menu item rather than a wellness shot. It reads social, but the structure is built around gut-first support.

□□□□□□□□□

Quality ginger beer matters here — look for bottles with real ginger character, not flat ginger flavoring. The drink should taste alive.

THE RECOVERY KERNEL

Bartender’s Friend

□□□□□□□□□

□□ 11 · JP

Companion booklet for the next three recipe builds.

19. The Patch

The Gut-Brain Patch. Applied Orally.

Post-substance gut damage · MTHFR variant · Malabsorption | Intestinal integrity · Nutrient absorption · Inflammation load

□□□	Rocks
□	Full ice
□□	• 60 ml fresh ginger juice or strong ginger syrup • 30 ml lemon juice • 30 ml apple juice • 15 ml honey • 3 dashes Angostura bitters • Top with soda water
□□□	Build over ice. Ginger, lemon, apple, honey, bitters. Top soda. Serve immediately.
□□	Crystallized ginger on pick + lemon wheel

□□□

Gingerols and shogaols in real ginger directly stimulate digestive motility and reduce intestinal inflammation through COX-2 inhibition — the same pathway targeted by ibuprofen, but without GI damage. Apple juice provides pectin, a prebiotic fiber that selectively feeds Lactobacillus and Bifidobacterium strains. Angostura bitters' bitter compounds stimulate gastric acid and bile production, improving breakdown and absorption of the very nutrients the recovering brain needs.

□□□□□□

This is the advanced ginger shot for people who want the gut support without the full garden. It's sharp, spicy, and self-evidently medicinal. Own it.

□ The gut lining after years of heavy use looks like a clear-cut forest. Gingerols are the ground cover that comes back first. Pectin is the reforestation project.

21. The Downshift

Decelerate. Not Crash. There's a Difference.

Cortisol high · Post-stim state · Stimulant recovery | Adrenal recovery · Cortisol clearance · Dopamine rebound management

□□□	Highball
□	Full ice
□□	• 60 ml cold chamomile or lavender tea • 30 ml coconut water • 22 ml fresh lemon • 15 ml honey • Splash of soda water • Fresh rosemary sprig
□□□	Lightly bruise rosemary. Build over ice: tea, coconut water, lemon, honey. Splash soda. Rosemary garnish.
□□	Rosemary sprig + lemon twist

□□□

Coconut water is the best natural electrolyte replacement available at a bar — sodium, potassium, and magnesium in bioavailable ratios. Electrolyte depletion is universal after high-cortisol periods and is one of the primary drivers of the post-stimulant crash. Rosemary contains rosmarinic acid (GABA-adjacent) and carnosic acid, a potent neuroprotective antioxidant that specifically protects dopamine neurons from the oxidative stress of the rebound period.

□□□□□□

The rosemary is structural here, not just visual. Bruise the sprig so the oils release into the drink. The rosemary aroma also activates the olfactory-memory pathway — grounding and orienting.

□ The stimulant crash is not about the substance leaving. It's about the oxidative damage to dopamine neurons in its wake. Carnosic acid in the rosemary is there specifically for that.

22. The Civilian

Looks Like a Drink. Is a Drink. That's All Anyone Needs to Know.

Social environment navigation · Sober social pressure management | Oxytocin support · Social comfort · Phenylethylamine (social bonding)

□□□	Rocks or coupe — your call
□	Your preference
□□	• 60 ml cranberry juice • 30 ml orange juice • 22 ml lime juice • 15 ml simple syrup • Top with soda water • Orange bitters 2 dashes
□□□	Build over ice or shake and strain. Either works. Serve how you like it.
□□	Orange wheel or nothing — fully optional

□□□

The Civilian is designed to look exactly like a cocktail in any social setting. The cranberry-orange-lime combination is indistinguishable from a cosmopolitan-adjacent drink. The psychological support for sober social navigation comes from the confidence of holding something that requires no explanation. Orange bitters' gentle bittering element also stimulates the bitter taste receptors that activate parasympathetic (calm) nervous system tone, reducing social anxiety.

□□□□□□

Serve this like you'd serve any drink. No commentary, no health explanation. The guest ordered a Civilian. You made them a Civilian. That's the transaction.

□ The most powerful thing about the Civilian is the conversation it doesn't require. Sometimes the protocol is social camouflage. The nervous system recovers in peace.

THE RECOVERY KERNEL

Bartender’s Friend

□□□□□□□□□

Pass 12 · JP

□□ 3 □□□□□□□□□□□□□□□□□□□□□□□□□□

Alexa

□□□□□□□□□□□□□

□□□□□□ Social anxiety · Serotonin transport variant · SLC6A4 □□□□□ Serotonin availability · Social ease · Stress-reactivity under social load

□□□: Highball □: Full ice

□□□

- 60 mL blue butterfly pea tea (or substitute with blueberry juice)
- 30 mL lemon juice
- 15 mL honey syrup
- 2 dashes lavender bitters (or Peychaud’s)
- Top with tonic water

□□□□ Build over ice. Tea (it turns purple with lemon), honey, bitters. Top tonic. Watch the color shift.

□□□ Lemon wheel + edible flower if available

□□□

Blue butterfly pea tea (or blueberry juice) provides anthocyanins that cross the blood-brain barrier and activate the BDNF pathway — brain-derived neurotrophic factor, the compound that supports neuroplasticity and the formation of new behavioral patterns. The color shift from blue to purple when lemon juice is added is a pH reaction — visually interesting, conversation-generating, and entirely appropriate for the social anxiety profile that needs an ice-breaker built into the drink itself.

□□□□□□

If the bar has butterfly pea tea (many craft bars do), the color shift is genuinely magical and a guaranteed conversation piece. If not, blueberry juice works and is equally functional.

□ BDNF is how the brain builds new roads. Anthocyanins are the road-building crews. The person ordered Alexa because they want the new roads. Give them the ingredients.

Siri

□□□□□□□□□□□□□□□□□□□

□□□□□□ Oxytocin support · Post-isolation social re-entry □□□□□ Social bonding · Oxytocin pathway · Post-withdrawal isolation

□□□: Coupe □: Up — chilled coupe

□□□

- 60 mL fresh watermelon juice (or pomegranate if out of season)
- 22 mL lime juice
- 15 mL honey
- 2 dashes Peychaud’s bitters
- Splash of grapefruit juice
- Shake hard

□□□□ Shake all with ice. Double strain into chilled coupe. Serve up.

□□□ Dehydrated lime wheel + expressed grapefruit peel

□□□

Watermelon contains L-citrulline, an amino acid that converts to L-arginine in the kidney, which then supports nitric oxide production — a signaling molecule that facilitates social bonding pathways and oxytocin release. Pomegranate (off-season substitute) provides punicalagins which have documented effects on cortisol reduction in social stressor studies. The elegant coupe presentation supports the social function of the drink: this is for the person re-entering the social world after isolation.

□□□□□□

This is the most beautiful drink on the list. The deep pink-red color in a chilled coupe. Serve it with the confidence of a cocktail you're proud of. Because you are.

□ The Isolation Algorithm (Protocol 16, Protocol 25) is about rebuilding the social neural pathways that went dark. L-citrulline is a tiny biological nudge in that same direction. The beautiful glass is the rest of the protocol.

The Protocol

□□□□□□□□□□□□□□□□□□□□

□□□□□□ Comprehensive · Daily maintenance · All profiles □□□□□ Full-spectrum support · MTHFR + COMT + Gut + Sleep + Social

□□□: Your best glass □: Your preference

□□□

- 60 mL pomegranate juice
- 30 mL green tea (cold brew)
- 22 mL lemon juice
- 15 mL honey
- 2 dashes Angostura bitters
- Splash ginger beer
- Top with soda water

□□□□ Build over ice. Pomegranate, tea, lemon, honey, bitters. Ginger beer splash. Top soda. Stir once. Garnish with everything you have.

□□□ Lemon wheel + mint sprig + pomegranate seeds if available

□□□

The Protocol contains the broadest functional spectrum of any drink in this guide. Pomegranate delivers folate (methylation), resveratrol (COMT modulation), and punicalagins (cortisol reduction). Green tea delivers L-theanine (alpha-wave calm), EGCG (neuroprotective antioxidant), and catechins (gut microbiome support). Lemon delivers Vitamin C (dopamine synthesis cofactor). Honey delivers prebiotic oligosaccharides and quercetin. Bitters deliver gentian (adrenal modulation). Ginger beer delivers gingerols (gut integrity and anti-inflammation). This is the Recovery Kernel in beverage form.

□□□□□□

This is the house recommendation when someone doesn't know what they want and isn't looking for an explanation. 'We have something that covers everything — it's called The Protocol.' Then make it like you mean it.

□ Every protocol in the main book has a biochemical target. This drink hits more of them than any other combination available at a standard bar. It's the daily maintenance stack. It's good. Order it twice.
